Application : Big Data Engineer

Dear Sir/Madam,

My Name is Vishal and I am student at University of Darmstadt perusing My Master in Distributed Software Systems. Currently, I am writing my Master thesis in the field of Big Data and natural language processing .

My skill-set further contains :

- Programming/ Development in C,C++, python, R and Java
- Understanding of Hadoop framework.
- Understanding for Distributed Software Systems
- Software Development Life Cycle
- Experience with AGILE methodology.

I understand that I don't have industry experience with Hadoop. But I am sure I posses the ability to work with the framework as soon as i get on board.

I am crazy for data whether its textual or binary. My other skills like hands on with statistical data ensures me than I can handle large amount of data.

I feel my eagerness to work on this technology can at least get me a chance to talk to you, so that can judge if I am suitable candidate for you or not.

I have enclosed my detailed resume that provides a detailed track record of my skills and achievements. I would greatly appreciate an opportunity to meet you in person to discuss the opportunity. Please feel free to call me at +491624228345 or email me at vishal266@yahoo.co.in.

Thank you very much for your time and consideration. Look forward to hearing from you.

Yours sincerely,

Vishal Vishal
