Application: **Firmware Verification Engineer**

Dear Sir/Madam,

My Name is Vishal and I am student at University of Darmstadt perusing My Master in Distributed Software Systems. Currently, I am writing my Master thesis in the field of Machine Learning and Natural language processing and planning to finish it soon in few months..

My skill set further contains :

o 4+ years of experience in programming and development
o Understanding for Distributed Software Systems
o Software Development Life Cycle
o AGILE methodology.

I would very much appreciate an opportunity to further implement my skills in the favor of the organization working in the same direction. . And I am confident that my academic background, combined with my professional experience, could be beneficial to your work environment.

As a Lead engineer at Samsung Research Institute I gained valuable experience working with people from diverse backgrounds. I also learned to think on my feet. These skills will undoubtedly help me work well with others in your organization, as well as provide excellent service for your customers.

My background and experience combined with my eagerness to work in research and development, make me ideally suited for the working opportunity with your organization. I have enclosed my detailed resume that provides a detailed track record of my skills and achievements. I would greatly appreciate an opportunity to meet you in person to discuss internship opportunities. Please feel free to call me at +491624228345 or email me at vishal266@yahoo.co.in.

Thank you very much for your time and consideration. Look forward to hearing from you soon.

Yours sincerely,

Vishal
